Thank you and welcome to our estate.

Olive oil and wine are our main products.

One hectare (10,000 square meters) is dedicated to our vines.

The vineyard is managed according to integrated pest management principles, where balanced soil and foliar fertilization helps the plants develop their own natural defenses.

Merlot, Cabernet Sauvignon, and Carmenere produce a full-bodied, savory red wine with an aromatic, long-lasting, persistent bouquet.

Production is closely guided by annual climatic trends. Depending on the year, we may produce single-varietal wines or create a harmonious blend of all selected varieties.

Our white wine— a blend of Pinot Bianco, Incrocio Manzoni, and Sauvignon— displays an equally persistent aromatic profile, defined by complex fruity notes that carry through the nose to the palate. As with our reds, production is strongly influenced by climatic and environmental factors.

Depending on the year, we may vinify the varieties separately, or craft them into intriguing blends.
